

Name _____ HR _____

1

7th Grade Unit 1: Tech Systems STAR Cards!

QUESTION	ANSWER
1a)  All systems have 4 main components. Define each of the 4 components. 1. Output 2. Feedback 3. Input 4. Process	1a) 1. <u>Output</u>-What comes out or is produced by a system. 2. <u>Feedback</u>-Information about how the system is working 3. <u>Input</u>-Things that go into a system 4. <u>Process</u>-What happens to the things that go into a system
1b)  Explain what each of the following subsystems does: 1. Suspension 2. Guidance 3. Propulsion 4. Structure 5. Control 6. Support	1b) 1. <u>Suspension</u>-supports the weight of a vehicle 2. <u>Guidance</u>-helps the vehicle stay on course 3. <u>Propulsion</u>-moves the vehicle forward 4. <u>Structure</u>-holds the vehicle up 5. <u>Control</u>-controls speed and direction 6. <u>Support</u>-helps the vehicle but not a part of it

QUESTION	ANSWER
1c)  - What are the 5 parts in every type of communication system (ex: <i>text messages</i>) - What are each of their jobs?	1c) 1.) <u>Source</u> - creates the original message/information to be communicated 2.) <u>Encoder</u>- changes the message into an electrical signal so it can be sent 3.) <u>Transmitter</u>- sends the electrical signal 4.) <u>Receiver</u>- captures the electrical signal 5.) <u>Decoder</u>- changes the electrical signal back to an understandable message
1d)  Why do we need different types of communication systems such as print, internet, radio and TV?	1d) We need different types of communications systems because there are different audiences with different resources receiving the communication.
1e)  A suspension bridge has a lot of forces acting on it. 1.) What type of force is acting on the <u>cables</u>? Explain your answer. 2.) What type of force is acting on the <u>columns</u>? Explain your answer. 	1e) 1.) Tension is acting on the cables because they are stretching 2.) Compression is acting on the columns because they are squeezing
