

Name _____ HR _____

1

8th Math Unit 1 - Transformations STAR Cards!

QUESTION	ANSWER
1a) ☆☆☆ What are the 4 kinds of geometric transformations and what do they do?	1a) 1. Transslation – <i>S</i>lide 2. Reflection – <i>F</i>lip 3. Rotations – <i>T</i>urn 4. <i>D</i>ilation – Shrink/Grow (different size)

QUESTION	ANSWER
1b) ☆☆☆ Below there are images that show the 4 types of transformations. Name what transformation is happening in each. 1.  2.  3.  4. 	1b) 1. Translation 2. Dilation 3. Reflection 4. Rotation
1c) ☆☆☆ 1. What does it mean if shapes are congruent? 2. What are the transformations that keep shapes congruent?	1c) 1. Congruent means the shapes have the exact same shape, size, and angles. 2. Rotations, Reflections and Translations
