5 Science Unit Engineering STAR Cards!

QUESTION	ANSWER
5a) ☆☆☆ What is the engineering design process?	5a) The engineering design process is the set of steps engineers follow when creating solutions to solve a problem
5b) ☆☆☆ When developing possible solutions to a problem, engineers need to consider the criteria and constraints of their design solution. What are <u>criteria</u> and <u>constraints</u>?	5b) <u>Criteria</u> = The things that make it a good solution <u>Constraints</u> = What you are allowed to work with
