5 Science Unit 3 Earth's Water Cycle

QUESTION	ANSWER
3a)  Identify the different steps of the water cycle in the picture. 	3a) 
3b)  1. What are the 4 major places we can find salt water on Earth? 2. What are the 4 major places we can find freshwater on Earth?	3b) 1. We can find saltwater in oceans, seas, gulfs, and bays. 2. We can find freshwater in rivers, lakes, groundwater, and glaciers/polar ice caps.

QUESTION	ANSWER
3c)  Most of the Earth is covered with water but we cannot drink most of it. What are the <u>two reasons</u> that this is true?	3c) 1. Most of the water on Earth is saltwater that we cannot drink. 2. Most of the freshwater on earth is frozen in glaciers and the polar ice caps.
3d)  What are <u>3 ways</u> that humans can help <u>stop pollution</u> of Earth's water cycle?	3d) 1. Water Treatment Plants 2. Reduce runoff from farms by creating natural filters 3. Reduce pollution and litter on the ground
3e)  Water filters are used by humans to clean water. 1. What should you think about when deciding what materials to use to make a water filter? <u>(Do not list the materials)</u> 2. How can you tell if a water filter is working?	3e) 1. You should consider the size of the particles you are trying to filter out. 2. The water is clear.
