6 Science Unit 4 Cells STAR Cards!

QUESTION	ANSWER
4a)  What are the 5 things ALL organisms need to be considered a living thing?	4a) 1. Made of cells  2. Uses energy  3. Responds to surroundings  4. Grows and develops  5. Reproduces 
4b)  1. Describe a unicellular organism. 2. Describe a multicellular organism.	4b) 1. <u>Unicellular organism</u> - has just ONE cell that performs <u>all</u> life functions. 2. <u>Multicellular organism</u> - has many specialized cells that perform <u>specific</u> functions

QUESTION	ANSWER
4c)  Cells have different parts called <u>organelles</u> that allow them to carry out functions of life. Describe the function of the following organelles: 1. Nucleus 2. Cell Membrane 3. Mitochondria 4. Vacuoles	4c) 1. <u>Nucleus</u>: Controls the cell 2. <u>Cell Membrane</u>: A barrier that protects the cell by controlling what comes in and out of the cell 3. <u>Mitochondria</u>: Changes food into energy 4. <u>Vacuoles</u>: Stores important materials for the cell
4d)  Plant cells have ALL the same <u>organelles</u> as animal cells but also need 3 additional organelles in order to help plants function and live. Describe the function of these <u>3 additional organelles that plant cells have</u> 1. Cell Wall 2. One Large Vacuole 3. Chloroplasts	4d) 1. <u>Cell Wall</u>: Provides structure and support 2. <u>One Large Vacuole</u>: Stores water - a. 3. <u>Chloroplasts</u>: traps sun energy to create sugar (food) for the cell
