## 6th Grade Math Unit 8: Positive and Negative Numbers STAR Cards

# 8

| QUESTION                                                                                                                                                                                                                                        | ANSWER                                                                                                                                                                             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>8a) ☆☆☆</p> <p>What is an <u>integer</u>?</p> <p>Give examples and non-examples of integers.</p>                                                                                                                                             | <p>8a)</p> <p>An <u>integer</u> is a positive or negative whole number or zero.</p> <p>(Examples: 45, -987, 0, 72)</p> <p>(Non-examples: 0.5, <math>\frac{2}{3}</math>, -46.9)</p> |
| <p>8b) ☆☆☆</p> <p>Give 4 real life examples where negative numbers make sense.</p>                                                                                                                                                              | <p>8b)</p> <ol style="list-style-type: none"><li>1. Under the water</li><li>2. Under the ground</li><li>3. Temperature</li><li>4. Money/Debt</li></ol>                             |
| <p>8c) ☆☆☆</p> <p><b><math> -8 </math></b></p> <ol style="list-style-type: none"><li>1. What are the lines around the <b>-8</b> above called, and what do they mean?</li><li>2. <math> -8  = ?</math></li><li>3. <math> 8  = ?</math></li></ol> | <p>c)</p> <ol style="list-style-type: none"><li>1. Absolute value: it is how far a number is away from zero. It is <b>always positive</b>.</li><li>2. 8</li><li>3. 8</li></ol>     |

8d)

How do you read each of these symbols?

$<$

$>$

8d)

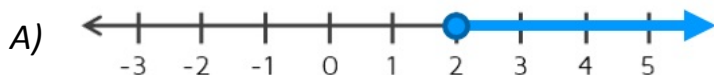

$<$  is less than

$>$  is greater than

8e)

1. What does  $x > 2$  mean?
2. Which of these graphs represents the inequality  $x > 2$  ?

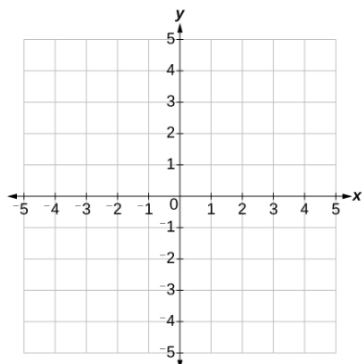

8e)

1.  $x > 2$  means that  $x$  **must be bigger than 2**, such as  $2\frac{1}{2}$ , 3, 4,...
2. B , because an open circle is used to represent a greater than or less than symbol on a graph.

8f)

How do you plot the point  $(-3,4)$ ?

8f)

- 1<sup>st</sup>) Start at  $(0,0)$
- 2<sup>nd</sup>) move 3 to the left
- 3<sup>rd</sup>) move 4 up
