8th Math Unit 2 - Congruence & Similarity STAR Cards!

QUESTION	ANSWER
2a) ☆☆☆ What does it mean if two shapes are <i>similar</i>?	2a) Similar shapes must have the same exact shape and angles, but can be different sizes.
2b) ☆☆☆ 1. What is a scale factor? 2. What is the difference between a scale factor of $\frac{1}{4}$ and 4?	2b) 1. A scale factor is the number you multiply by to make a shape bigger or smaller 2. • $\frac{1}{4}$ makes the shape $\frac{1}{4}$ the size (smaller) • 4 makes the shape 4 times as big

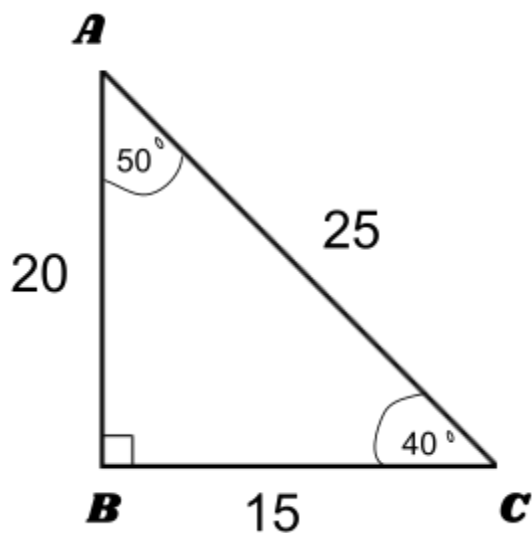

QUESTION

2c)

Triangle ABC (below)
underwent a dilation with
scale a factor of $\frac{1}{5}$.

Draw the new triangle and
label it $A'B'C'$ and include
the angles and side lengths.

ANSWER

2c)
